Technical supplement to the Main Report of the Third Assam State Finance Commission

- 11.1 The Ad Interim Report of the Third Assam State Finance Commission was submitted to the Government of Assam on March 31, 2007. It was formally presented to the Chief Minister on April 26, 2007.
- 11.2 In the Ad Interim Report certain principles were recommended for the constitution of the Divisible Pool and the distribution of funds to PRIs and ULBs out of the Divisible Pool. The multiplying factors for this purpose for all the PRIs and ULBs were worked out and presented in September , 2007.
- 11.3 The data supplied to TASFC earlier for calculation of indices were revised later. TASFC had to work for cleansing and revalidation of the population data. Now the Technical Supplement is prepared with updated data. The projected devolution is calculated for all 2479 (2202 GPs, 185 APs, 20 ZPs and 72 ULBs) entities for all the 4 years (2007-11). It had been recommended in the Ad Interim Report that no devolution need be made for the year 2006-07.
- 11.4 The spread sheet developed for the purpose is param eterized and can be used by GOA while making devolution of any amount to PRIs and ULBs. In this connection the note appended may be referred to.
- 11.5 As per TOR the Divisible Pool is for the state of Assam excluding the areas falling within the units formed under the Schedule VI of th e Indian Constitution.
- 11.6 The entire amount of the Divisible Pool (DP) is to be given as untied funds to PRIs and ULBs during 2007-11. It is recommended that the amounts should be utilized by each PRI and each ULB for non-plan expenditure on salaries and

establishment, on repair and rejuvenation of water supply and sanitation projects, on repair of local roads and other public assets, on solid waste management schemes and on any other locally felt needs. The decision should be left to the respective PRIs and ULBs.

Note on the Devolution framework

1. The Multipliers to be used for distribution of fund under the Divisible Pool to PRIs and ULBs in Assam have been constructed applying the methodology and variables as recommended by the Third Assam State Finance Commission (TASFC).
2. The Districts under BTAD viz. Kokrajhar, Chirang, Baska and Udalguri as well as the two Hills Districts viz. Karbi-Anglong and N. C. Hills have been excluded for the purpose of construction of the multipliers as these districts fall under Schedule VI of the Indian Constitution where a different system is followed. Moreover, forest areas are also not taken into account while deciding the area under different districts both for the rural and the urban sectors. All calculations relate to only the remaining areas of the State of Assam.
3. Due to formation of new districts under BTAD by carving out areas of some of the erstwhile districts, seven districts, namely, Dhubri, Bongaigaon, Barpeta, Nalbari, Kamrup, Darrang and Sonitpur have been affected in terms of area and population. The adjustment of Area and Population figures of these affected districts has been accomplished using the information supplied by the Directorate of Panchayat and Rural Development, Assam. Data related to the forest areas have been obtained from the Forest Department and necessary adjustments have been made accordingly.
4. The following GPs appeared in the Report of the Second Assam State Finance Commission (SASFC). These are found to be non existent due to reasons mentioned against each.

1.	Ganakkuchi G. P.	Included under Barpeta M. B.
2.	Gohpur G. P.	Included in Gohpur T. C.
3.	Margherita Nagar & Margherita G. P.	Included in Margherita T. C.
4.	Titabor G. P.	Included in Titabor T. C.
5.	Raha G.P.	Included in Raha T.C.

5. Kamrup and Kamrup (Metro) are considered as one single district as there exists no separate Zila Parishads. However, for calculation of per capita NDDP the data related to only Kamrup district has been considered.
6. For estimation of multipliers in respect of Urban Local Bodies the necessary materials have been collected from the Directorate of Municipal Administration, Assam. The Area and Population of 5 Town Committees (Roha, Teok, Titabor, Dhakuakhana and Narayanpur) are approximated because these came into being after the Census of 2001.
7. The District Domestic Product (DDP) for the year 2004-2005 has been used for estimation of District Level Indicators for the rural sector. The DDP for the year 2004-2005 has been prepared by the State Income Division of the Headquarters of the Directorate of Economics and Statistics, Assam.

Methodology for distribution of the Divisible Pool among PRIs and ULBs

- a. The Divisible Pool is first apportioned between PRIs and ULBs on the basis of joint consideration of population and density of population as per the 2001 Census giving 80 percent weightage to population and 20 percent weightage to population density. The population and density of the two Hill Districts viz. Karbi Anglong and N. C. Hills District and the four districts under BTAD viz. Kokrajhar, Chirang, Baska and Udalguri have been excluded as these districts fall under the Schedule VI. Moreover, population belonging to the Census Towns (CT) and Out Growth (OG) areas has been included in the rural sector because no separate ULBs are in existence. The area under forest is also excluded in case of both rural and urban sectors. On the above basis the Rural: Urban ratio is estimated as 0.727637006: 0.272362994.
- b. The rural leg estimated as per para (a) above is allocated to 20 plain districts (considering Kamrup and Kamrup Metro as one) on the basis of rural population as per 2001 Census, rural area (excluding forest area) and per capita net district domestic product pertaining to primary sector net of mining and quarrying for the year 2004-2005 at constant (1999-2000) prices. A composite index has been constructed with the above three parameters giving weightage as follows –

1.	Rural Population	50%
2.	Rural Area	25%
3.	Per Capita DDP of primary sector net of mining and quarrying	25%

- c. As regards per capita NDDP, the inverse method has been adopted by taking the inverse of the per capita NDDP of the year 2004-2005.
- d. The district rural fund arrived at as per para (c) above is allocated among ZP / APs / GPs in the ratio of 20: 30: 50.
- e. The allocation to ZPs is in the statement at **S-4 (ZP)**. The horizontal allocation among GPs and APs has been done on the basis of population as per 2001 Census. The allocations for APs and GPs are in the statement at **S-5** and **S-6** respectively.
- f. The urban divisible pool estimated as per para (a) above is allocated among the Guwahati Municipal Corporation/ Municipal Boards and Town Committees on the basis of population as per 2001 Census and geographical area as well as infrastructure index and average per capita tax collection. The infrastructure index is a composite index of three indicators viz. length of surfaced roads, length of pucca drain and number of street lights giving equal weightage to each indicator. A composite index taking into account the four indicators viz. population, area, infrastructure index and average per capita tax collection is constructed with the following weightage.

1.	Population	50%
2.	Area	25%
3.	Infrastructure Index	12.5%
4.	Per capita tax collection	12.5%

The statement at **S-9** provides the ULB-wise projected devolution for 4 years separately.

- g. All the statements at **S-4 (ZP)**, **S-5**, **S-6**, **S-9** indicate the multiplying factors for the purpose of estimating the amount to be transferred during in the years 2007-08, 08-09, 09-10, and 10-11, respectively, to each PRI and ULB out of the total Divisible Pool. The Divisible Pool multiplied by the multiplying factors will indicate the amount due to each PRI and ULB. These allocations for each PRI and ULB for all the four years (2007 – 2011) have been worked out and presented as projected devolution. The spread sheet is however parameterized and will calculate the actual devolution to each PRI and ULB once any amount is entered into appropriate cell (c30:e30) in the table of control parameters given at statement **S-1**.

8. It is clarified that the number and names of GPs, APs and ZPs have been obtained from the Directorate of Panchayats and Rural Development. Names and basic parameters for the ULBs are obtained from Director, MAD and Commissioner, GMC.
9. The population figures for the rural areas were provided by the Director, P&RD to the Director, Economics and Statistics while preparing the technical supplement to the Ad Interim Report. These data were used for arriving at the devolution indices in the technical supplement submitted earlier. Some discrepancies were detected by TASFC – the population figures of Census Towns and Out Growth (OG) areas were not included in the rural population figures provided earlier. It took almost a couple of months to rectify the errors. Finally the figures have been authenticated by (i) Director, Economics and Statistics, (ii) Director, P&RD, (iii) Director, MAD and (iv) Commissioner, GMC.

S - 1

Control Parameters for Construction of Devolution Indices

1	Total Population	22913215	
2	Total Rural Population	20198790	
3	Total Urban Population	2714425	
4	Total Rural Area	40658.64	Sq Km
5	Total Urban Area	689.47	Sq Km
6	Weightage for population	80%	
7	Weightage for Density	20%	
8	Rural Leg of DP	0.727637006	
9	Urban Leg of DP	0.272362994	
10	Weight factors for determinining the share of a district in rural DP		
a.	Population	50%	
b.	Area	25%	
c.	Per Capita NDDP	25%	
11	Weight factors for Determining Share of ZP, AP and GP out of Rural DP of a District		
a.	ZP	20%	
b.	APs	30%	
c.	GPs	50%	
12	Weight factors for determining Share of a ULB out of Urban leg of DP		
a.	Population	50%	
b.	Area	25%	
c.	Infrastructure	12.50%	
d.	Tax Collection	12.50%	

	2007-08	2008-09	2009-10	2010-11
Size of DP (Projected)	3637700000	8821100000	9332600000	9849600000
